Dear Candidate,

I hope you're doing well, I'd like you to know that we are currently confronted with the problem of socialized healthcare. We believe that socialized healthcare would be ideal, but we do not have the resources to sustain it. Overall, socialized healthcare is a bad idea. Hold the idea of capitalistic health care and a free market opportunity. Socialized healthcare could create problems including a shortage of doctors, longer wait times, and overcrowded hospitals in these hard times.

Sincerely,

Ryan Sellers
