Dear Candidate,

We believe that gun control would be a bad decision because taking away people's guns would cause rebellion and outbreaks. Also, the reasons for taking away guns is for the reason that they are dangerous and oftentimes used for shootings. But realistically if we take away guns, people will find other sources of weaponry. After they find alternatives for guns the citizens will no longer have a form of protection. It also goes against the 2nd amendment that states the right to keep and bear arms. All of this considered, we will allow guns but ban all fully automatic and military grade firearms. We will ban automatic guns to citizens because there is no real reason to have one except for sport and they will still have many options of other guns to have. We will also make more restrictions on buying them. Each person must go through a background check, have a mental wellness exam, and no one who has been in jail in the past year is permitted to own a firearm.

Sincerely,

Ronelle Schamp
